Hello Gary Moore. I'm Jim Blackburn, an environmental lawyer here in Houston and a friend has asked me to take a look at the CES Environmental Services site. I would enjoy talking with you further about this site. My friend runs a neighborhood redevelopment entity that is concerned that this site is a major problem to various redevelopment concepts that might be considered. I tend to agree. Is there a timetable for removal of the waste within the soil and within the groundwater? Are there plans for other testing of the groundwater, particularly on the neighborhood side of the groundwater plume? Can I get a list of the PRPs for the site? What is EPA doing at the current time? These are some of the questions that I have. If you would rather discuss by phone, feel free to call me at 713-501-9007. Blackburn.
